
LET'S GET EVERYTHING SET UP!

1. In Schoology, go to: **Courses(in the top menu) > FEWD CHI 1: Section 1**
2. Then go to the **Class Materials** folder — it's the pink one!
3. Navigate to the **Week 10 (It's the yellow folder) > Lesson 17 folder**
4. There you'll find all the materials for today's class
5. Download `starter_code_lesson_17.zip`
6. Move it from your Downloads folder to your Desktop
7. Double-click on `starter_code_lesson_17.zip` to unzip it
8. After you've unzipped, delete the original .zip to avoid confusion and make sure you don't unzip it again later!!!

GA GENERAL ASSEMBLY

ANIMATION

Sarah Holden

LEARNING OBJECTIVES

- Be able to explain why CSS animations are preferred over jQuery animate.
- Familiarity with how animations and transitions can be used in CSS
- Understand how animation can still be controlled using JS

AGENDA

- jQuery Animate
- Transitions
- Transformations
- Animations
- Lab

ANIMATION

JQUERY ANIMATE

LET'S TAKE A CLOSER LOOK

Syntax: [jQuery Docs - Animate](#)

CODE ALONG

ANIMATION

TRANSITIONS

TRANSITIONS

- Provide a way to control animation speed when changing properties
- Instead of having property changes take effect immediately, you can have them take place over a period of time.

```
.example {  
  transition: [transition-property] [transition-duration] [transition-timing-function] [transition-delay];  
}
```

TRANSITIONS

**PROPERTIES
TO ANIMATE**

Which properties
to animate

DURATION

How long the
transition will last

**TIMING
FUNCTION**

How the transition
will run

DELAY

When the animation
will start

TRANSITIONS – TRANSITION-PROPERTY

**PROPERTIES
TO ANIMATE**

- ▶ Can specify a specific property to transition or "all" to transition all properties
- ▶ *Default:* all

```
div {  
  transition: opacity 0.5s;  
}
```

```
div {  
  transition: all 0.5s;  
}
```

```
div {  
  transition: height 0.5s;  
}
```

```
.example {  
  transition: [transition-property] [transition-duration] [timing-function] [transition-delay];  
}
```

TRANSITIONS – TRANSITION-DURATION

DURATION

- ▶ A time value, defined in seconds or milliseconds

```
div {  
  transition: all 0.5s;  
}
```

```
div {  
  transition: all 350ms;  
}
```

```
div {  
  transition: all 3s;  
}
```

```
.example {  
  transition: [transition-property] [transition-duration] [timing-function] [transition-delay];  
}
```

TRANSITIONS

TIMING FUNCTION

- Describes how a transition will proceed over its duration, allowing a transition to change speed during its course.
- Timing functions: ease, linear, ease-in, ease-out, ease-in-out

```
div {  
  transition: opacity 0.5s ease;  
}
```

```
div {  
  transition: opacity 0.5s ease-in-out;  
}
```

```
.example {  
  transition: [transition-property] [transition-duration] [timing-function] [transition-delay];  
}
```

TRANSITIONS

DELAY

- ▶ Length of time before the transition starts

```
div {  
  transition: background-color 0.5s ease 2s;  
}
```

```
.example {  
  transition: [transition-property] [transition-duration] [timing-function] [transition-delay];  
}
```

LET'S TAKE A CLOSER LOOK — IMAGE SLIDER

CODE ALONG — IMAGE GALLERY WITH OVERLAYS

MORE FUN WITH TRANSITIONS — CODROPS

Fun CSS button styles: [Creative buttons](#)

Icon hover effects: [Icon Hover Effects](#)

Modal dialogue effects (advanced): [Dialogue Effects](#)

ANIMATION

TRANSFORMATIONS

LET'S TAKE A CLOSER LOOK — TRANSFORM

Syntax: [W3 Schools](#)

Example: [Codepen](#)

LAB — HAMBURGER ICON

ANIMATION

ANIMATIONS

KEYFRAME ANIMATIONS

- ▶ Keyframe animations allow developers to create smooth, maintainable animations that perform well and don't require tons of scripting

KEYFRAME ANIMATIONS — SYNTAX

1. Define custom animation

```
@-webkit-keyframes NAME-YOUR-ANIMATION {  
  0%   { opacity: 0; }  
  100% { opacity: 1; }  
}  
@keyframes NAME-YOUR-ANIMATION {  
  0%   { opacity: 0; }  
  100% { opacity: 1; }  
}
```

2. Assign using the animation property

```
#box {  
  -webkit-animation: NAME-YOUR-ANIMATION 5s infinite;  
  animation:        NAME-YOUR-ANIMATION 5s infinite;  
}
```

A simple tool to make sure you're including all the necessary browser prefixes: [pleasease](#)

KEYFRAME ANIMATIONS — ANIMATION PROPERTY

Properties:

```
.box {  
  animation-name: bounce;  
  animation-duration: 4s;  
  animation-timing-function: ease-out;  
  animation-delay: 2s;  
  animation-iteration-count: 10;  
}
```

Shorthand:

```
.example {  
  animation: name duration timing-function delay iteration-count;  
}
```

```
.example {  
  animation: bounce 4s ease-out 2s 10;  
}
```

LET'S TAKE A CLOSER LOOK

LAB — LOADER

ANIMATION

ANIMATION/TRANSITION END EVENTS

ANIMATION

LAB

LAB

ACTIVITY

EXERCISE

KEY OBJECTIVE

- Practice triggering CSS transitions with jQuery

TYPE OF EXERCISE

- Individual/Partner Lab

TIMING

10 min

1. Add base styles to the page

Until 8:50

2. Make sidebar interactive using jQuery and CSS transitions.

LEARNING OBJECTIVES

- Be able to explain why CSS animations are preferred over jQuery animate.
- Familiarity with how animations and transitions can be used in CSS
- Understand how animation can still be controlled using JS
